IDEAL FOR THE FOOD INDUSTRY

Positioner for absorbent pads to be arranged in the customer's container for the purpose of packaging.

Starting with four dispensers—or as many as needed based on demand—the machine is fed so that a pneumatic system subsequently removes the product from each dispenser.

This pneumatic system allows for high operating speeds and adapts to the customer's specific production process. Manufactured from material suitable for the food industry. Easy to clean.

GENERAL FEATURES

- Protection in accordance with CE regulations.
- IP65 electrical protection.
- Versatile, customizable programming to suit your needs.
- Compatible with any thermoforming machine model: quick integration into the customer's production line.
- Minimal maintenance: Sturdy construction and industrial-grade components.
- Designed to work with absorbent materials that have a high porosity rating.
- Hygienic design.
- Configurable position: It can be placed before or after the meat is loaded, so that the absorbent material can be positioned either below or above the piece of meat.

OPTIONAL ACCESSORIES

- SMultiple dispensing system.
- Standard or porous absorbents.
- Fully customizable, depending on the product's dimensions.
- Optical product level detection system tailored to customer requirements.
- Manufacture of a specialized cart for changing loaders.
